2024 AID Urgent Dermatology Course

Dear Colleagues, In 2024 the Institute will complete Part 2 of a general Dermatology course utilising a textbook called **Urgent Dermatology by Fitzpatrick and High** This book is best used in eBook format. It covers a lot of general dermatology but concentrates more on conditions where quick recognition and rapid investigation and treatment are important in achieving a good result. It will be relevant to day-to-day skin practice. I have done webinars for each of the modules from the book that you should look at prior to the webinar. In the webinar I will show additional cases and expand on the topic under discussion.

The course will be run from the website at www.aidpostfellowship.com   where you can also submit cases for discussion if you wish or better submit cases to the Alumni website www.aidskinconsult.com   for discussion there. The webinars will again be every 2 weeks on a Thursday night at 7.00 PM my time. The course will run over 2 Semesters of 14 weeks each semester. It will begin the 1st Feb. There will be no exams. Participation in this course and the Alumni webinars will cover most of your 50 CPD hours for 2024

You can Register for the course by downloading the Registration form from the Contact or Register tabs of the www.aidpostfellowship.com website or via the attached PDF .
